

ПЕРСПЕКТИВЫ РАЗВИТИЯ ГЕРОНТОЛИНГВИСТИЧЕСКОЙ ПАРАДИГМЫ ЗНАНИЯ

Л. А. Пашина

Сибирский государственный индустриальный университет, Новокузнецк (Россия)

Введение. Цель данной статьи состоит в актуализации социального взгляда на феномен старения. В статье осуществляется обзор современных зарубежных исследований, посвящённых анализу социальных аспектов старения. Автор описывает наиболее значимые темы этой области исследований. В статье рассматривается формирование научного интереса к изучению языковой опосредованности феномена старения. Анализируются причины востребованности геронтолингвистических знаний, приводятся аргументы, обосновывающие их актуальность.

Методы. Основу исследования составляют общенаучные методы познания (анализ, синтез, логические методы).

Основные идеи исследования, полученные результаты и их обсуждение. В статье рассматривается становление научного интереса к исследованию языкового опосредования феномена старения. Анализируются причины востребованности геронтолингвистического знания, приводятся доводы, обосновывающие его актуальность. Описываются основные направления исследований связи языка и процесса старения, а также существующие интерпретации термина «геронтолингвистика».

Заключение. По результатам исследования сделан вывод о том, что геронтолингвистика становится междисциплинарной областью, аккумулирующей усилия всего корпуса геронтологического знания, направленного как на поддержание языкового здоровья стареющего населения, так и на реализацию стратегии активного и здорового старения в условиях перехода к гипервозрастному обществу.

Ключевые слова: геронтолингвистика, старение, геронтология, языковое старение, языковое здоровье пожилых людей, благополучие языковой жизни пожилых людей.

PROSPECTS FOR THE DEVELOPMENT OF GERONTOLINGUISTIC PARADIGM OF KNOWLEDGE

L. A. Pashina

Siberian State Industrial University, Novokuznetsk (Russia)

Introduction. The article considers the formation of scientific interest in the study of language mediation of the phenomenon of aging. The reasons for the demand for gerontolinguistic knowledge are analyzed, and the arguments justifying its relevance are given.

Methods. The research is based on general scientific methods (analysis, synthesis, logical methods).

Results. The article deals with the constitution of scientific interest in the study of language mediation of the phenomenon of aging. The reasons for the demand for gerontolinguistic knowledge are analyzed, and the arguments justifying its relevance are given. The article describes the main directions of research on the relationship between language and the aging process, as well as existing interpretations of the term "gerontolinguistics".

Conclusion. It is shown that gerontolinguistics is becoming an interdisciplinary field that accumulates the efforts of the entire body of gerontological knowledge aimed both at maintaining the language health of the aging population and at implementing the strategy of active and healthy aging in the transition to a hyper-age society.

Keywords: gerontolinguistics, aging, gerontology, language aging, language health of the elderly, well-being of the elderly's linguistic life.
